Education

National Institute of Technology Tiruchirappalli, Tamil Nadu

09/2020– 06/2023

Master of Computer Application

CGPA: 7.83

Government. Holkar Science College Indore, Madhya Pradesh

08/2017– 06/2020

Bachelor of Computer Application

Percent: 63.95

Experience

GammaEdge Technologies

June 2025 – Present

Associate Software Engineer | Onsite

Indore, India

- **Release Automation:** Replaced a manual, Excel-based tracking process with an automated system for managing **Real User Monitoring (RUM)** interactions across quarterly release cycles, using **React.js**, **FastAPI** and **PostgreSQL**.
- **Data Ingestion Pipeline:** Enhanced scheduled backend processing pipelines using **FastAPI** and **PostgreSQL** to ingest interaction data from **Splunk** automate classification workflows, and persist processed data for release management.
- **API & Workflow Development:** Developed **REST APIs** and implemented interaction search, filtering, pagination, bulk updates, and cURL-based operations to streamline release verification and interaction management.
- **Database Integration:** Worked with an internal relational database service using named and ad-hoc SQL queries, following predefined query contracts and payload structures to perform data operations.
- **Frontend Development:** Developed a centralized **React.js** interface for viewing and managing interactions, supporting release selection, field-level validation, pagination, case-insensitive search, multi-column filtering, and bulk interaction management.
- **Performance Analysis:** Investigated **TP95** performance issues using browser DevTools, waterfall analysis, and **Splunk** trace logs to identify high-latency APIs and troubleshoot service-level bottlenecks.

Technical Skills

Languages: Python, C++, JavaScript, TypeScript

Frameworks & Technologies: FastAPI, REST APIs, React.js, Node.js, Express.js

Databases: PostgreSQL, MongoDB

Developer Tools & AI Productivity: Git, GitHub, Postman, Splunk, Docker, Cursor, Claude, GitHub Copilot

Generative AI: LLM Architecture, Prompt Engineering, Embeddings, RAG Concepts, Tokenization

Core Concepts: Data Structures & Algorithms, Object Oriented Programming, Operating System, Networking

Projects

Enterprise IT Support Platform | *FastAPI, PostgreSQL, SQLAlchemy, Alembic*

- Designed and developed RESTful APIs for user authentication, ticket management, and file attachments using FastAPI.
- Designed relational database schema using SQLAlchemy ORM and managed database versioning with Alembic migrations.
- Implemented JWT-based authentication, role-based authorization, and optimized database access for secure and efficient API operations.
- Developed bulk operations, advanced filtering, pagination, and transaction management for scalable ticket processing.

NITT Lost & Found Portal | *React.js, Node.js, Express.js, MongoDB*

- Developed a full-stack web application for students to report and find lost or found items on campus
- Implemented NITT webmail-based authentication and dynamic item posting.
- Enabled search, image uploads, and item filtering features using React for frontend and Express/Node.js for backend services.

Achievements & Extracurricular

- Qualified in NIMCET 2020, a national-level MCA entrance exam.
- Also selected in: JNUEE (JNU MCA), PET (BHU MCA), BIT MCA, HCU MCA, KIITEE MCA, VIT MCA (2020).
- Secured 3rd position in Webista Acumen'20, intra-departmental tech fest by ACM Student Chapter, NIT Trichy.
- Participated in charity sports events like Badminton and Kho-Kho.
